Our focus will be the politics and poetics of racial exclusion and inclusion, power and resistance, and integration and separatism in shaping and defining the national "imagined community", but we will also pursue intersectional analyses, asking where, when, and how ideas about class, sexuality, gender, and disability have informed and been informed by ideologies concerning race and national identity. Also offered as USLT498C and AMST498P. Credit only granted for AAST498P, USLT498C, or AMST498P.

Credits: 3 | Grading Method: Regular, Pass-Fail, Audit | CORE: IE | General Education: DSHU, SCIS

What makes a technology socially responsible? At UMD, the Fearless Ideas campaign asks us to aim our enthusiasm for technology at big real problems. At the same time, we are coming to appreciate the increasingly complex nature of technological systems as they become integrated into all forms of infrastructure, we realize they may be unpredictable, interdependent on social and biological systems, and have unintended consequences. In this midst of this complexity, people make decisions with far reaching impacts. How then do we follow our passion for technology and innovation but also stay skeptical in a way that allows us to consider the potential and shortcomings of technology? Designed for both engineering and non-engineering students wishing to explore and assess the impact of engineering technology on society and the role of society in generating that technology.

Credits: 3 Grading Method: Regular, Pass-Fail, Audit

Specific content to be announced when courses are offered.

This online course explores a century of representations of race and racism in US cinema, both via Hollywoods studio system and through more marginalized (independent) productions. We examine film and identity through multiple methodological and theoretical lenses, including film history, formalist critique, audience reception analysis, and film and media theory. Our focus will be the politics and poetics of racial exclusion and inclusion, power and resistance, and integration and separatism in shaping and defining the national "imagined community", but we will also pursue intersectional analyses, asking where, when, and how ideas about class, sexuality, gender, and disability have informed and been informed by ideologies concerning race and national identity. Also offered as AMST498P and AAST498P. Credit only granted for USLT498C, AMST498P, or AAST498P.
